

Advantages of LawSoft CAD/RMS over the competition...

Attach and Email Reports in one button click

- LawSoft CAD/RMS has an integrated feature that will save any report in portable document format, also known as a “pdf”. Forms saved as a pdf can be viewed on any computer as long as the recipient has the free Adobe Reader program installed on their computer. This feature not only saves the report as a pdf, but it also attaches the report to your email and automatically password protects the report so you can be assured that it is open by the person you intended to sent it to. These features require no extra software to be purchased. They’re built right in to LawSoft CAD/RMS.

Only LawSoft, Inc. offers this!

Integrated Information Sharing

- LawSoft CAD/RMS has a unique information sharing ability between agencies that are currently using the LawSoft software. You can run a master name search through your departmental records and simultaneously search through multiple agencies all without leaving the system. Other companies boast of information sharing but only LawSoft allows you to do it as an integrated feature of the software that you use everyday.

Only LawSoft, Inc. offers this!

Robust Relational Database Record Management

- LawSoft CAD/RMS will track any contact throughout the entire system of reports, their history of where they’ve resided and whom they’ve been associated with. These data mining features will greatly assist investigations and give a true complexion of a suspect’s background in a fraction of a second. Case Management has never been easier with the most robust set of reports offered by any CAD/RMS company today. Other systems often lose reports, or are too difficult to use, but with LawSoft all reports easily tie together by case number and are displayed on one screen. LawSoft also offers true “Drill down” capability for data mining purposes thru advanced relationship technology.

Only LawSoft, Inc. offers this!

Integrated Mapping

- LawSoft CAD/RMS will automatically provide an overhead map or satellite image of the location that Officers are responding to with the click of a button. This requires no third party vendor software that can cost thousands of dollars extra.

Only LawSoft, Inc. offers this!

Unlimited Data Storage

- LawSoft incorporates a database engine that that allows for more than 20 modules with a capacity of 8 Terabytes each. That’s 40,000 times the data storage of a SQL Server Express based database solution. With the advancements in digital media such as photos and videos, file sizes are becoming huge and have the potential to cause a system with limited file size to fail.

But that’s not a concern for LawSoft. Our software is ready for the challenges several years in advance.

Only LawSoft, Inc. offers this!

True Multi-Jurisdictional Dispatch

- LawSoft CAD / RMS allows agencies to securely access other agencies systems to create dispatch calls and assign reports to officers in that agency while maintaining separate systems from their own or other agencies. The competition uses the “one big bowl of soup” approach and all dispatch activity for all agencies involved resides in one contiguous log. LawSoft CAD/ RMS also allows dispatchers to view all past activity from every agency involved as well as Firearm, TRO and MV History kept in that particular agency.
