We make reporting easy, efficient and effective...

- *LawSoft CAD/RMS comprehensive database program effectively generates reports and retrieves data at the touch of a button. LawSoft CAD/RMS is a client/server network solution, which runs on Win XP Pro, Win Vista Business, Win 7 Pro, Win 2003 & 2008 Server and MAC platforms. It can also be securely accessed over your in car Mobile Data Computers (MDC's) for remote access reporting giving officers important information when needed.*
- *Information entered in the system is secured by different levels of access which is assigned to users results in a granular security schemes which allow you to specify a time limit in which to edit information, restrict editing capabilities to the individual assigned to the report or a combination of both in which a user can only edit their own report for a predetermined period of time. This secures the integrity of your records.*
- *Data that is transferred on your network is secured and encrypted via SSL (Secure Sockets Layer) and data file size is virtually limitless.*
- *LawSoft CAD/RMS can be custom tailored to your department's needs and fully implemented in a reasonably short amount of time.*
- *The CAD (Computer Aided Dispatch Module) allows you to track Officer's locations as well as their availability status. Also dispatch can advise of critical information related to that address such as TRO's, firearms, history, prior MV stops of a Registration, etc. Integrated AVL and CAD mapping make dispatching more effective and easier then ever.*
- *Record Management System (RMS) features integrate Investigations, Arrests, Property, Domestic Violence Offense Reports, State of NJ Crash Reports and many, many more. All reports are attached to one case number can be found in less than a second. Digital media (photos & video) are incorporated into the system as well.*
- *Officers will take advantage of the one time information capturing feature. Once any information is entered into the system it will populate in any future reports, thus eliminating redundant entering of information. All information is cross-referenced between reports.*
- *LawSoft CAD/RMS will greatly improve record keeping efficiency, accuracy and security while easily generating monthly statistical reports and generating NJ State UCR Reports in seconds.*
- *LawSoft CAD/RMS is the only program of its kind that can allow secure remote access with built in 168-bit SSL encryption. Using this technology information can be easily and safely shared with participating agencies for information sharing.*
- *Our seamless integration with Infocop allows for DMV look-ups to be conducted in order to populate reports and CAD entries instantly at the click of a button.*
