

LAWSOFT - CAD / RMS

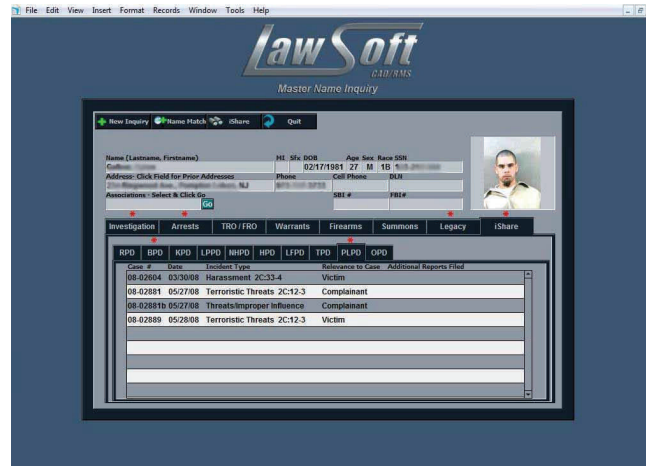

Inter-Departmental Information Sharing "iShare"

LawSoft, Inc. is pleased to announce a new integrated information sharing function that is built into our Master Name Inquiry module. Now when you perform an inquiry on an individual the system will search other LawSoft systems and return information that is relevant to the subject of your inquiry. Departments have the control over what information is shared and which departments they want to share with. This function is available across county lines since it only takes an inter-local agreement between the Chief's / Police Executives in their respective agencies.

While other companies struggle to integrate true information sharing and rely on county wide systems to gather information on potential suspects, LawSoft brings you true information sharing right into your patrol vehicle or your dispatch desk instantly. No logging onto a county wide system is required. LawSoft's Master Name Inquiry screen will automatically grant the user a "Read-Only" permission to view the subject's history across multiple departments. This provides users with valuable information as to a subject's background without making several calls and waiting hours for a response from other busy agencies.

Secure Information:

- All data is protected via 168-bit SSL encryption between the server and the client requesting information
- Data delivered is not stored and is strictly "Read-Only"
- Shared information available in patrol vehicles

WHEN SECONDS COUNT...

- Live up to date information
- Data received instantly
- Access to vital data enhances Officer safety

LawSoft's Information sharing will greatly assist officers whether in the field, or at the desk in obtaining important information. Results are provided instantly, rather than waiting for dispatch to

search county systems or call multiple agencies. When dealing with the subject of an arrest, motor vehicle stop, domestic, etc... the information received will instantly give the background of the person you're dealing

with if they've been involved with any other participating agencies.
